Subject: Architecture comments

Hello Tim,

We have a few comments regarding the architecture guidelines. We recently went through the process of having our garage doors replaced. We do not feel it is necessary for neighbor approval (especially 4) to have doors replaced that will remain the same color and similar style. We feel the most convenient and efficient way to get approval would be to have colors and styles listed on the website and then have a quicker turnaround time. We were not able to use our garage for about 6 weeks while waiting for this lengthy process to go through.

We are very happy to see the neighborhood working on it's appearance and maintenance. However, we do not agree that requiring grids on windows and certain mulch color as beneficial to our community, nor will that have an effect on property value. People have individual styles and should be allowed to reflect this as long as they are maintaining their homes.

We also feel the fines are excessive and should be lowered.

Thank you for your attention,

Amy and Dan Farrell
